Modification of Artesian MWAC

Meiners Oaks Water District implemented the new water allocation program in December 2021. It was discovered that the new Artesian (Memory Care) Assisted Living facility at 203 E El Roblar had finally opened. Aside from determining the appropriate allocation, at that time, the Monthly Water Availability Charge (MWAC) was set at 64, as there are 64. The Artesian has individual bedrooms, each with a private bathroom, within 4 buildings. In addition, the facility has shared common areas for dining, activities, and laundry services. The Artesian is classified as Commercial, in alignment with the other assisted living facility in the District. However, the other assisted living facility only has one MWAC per building, but with shared bedrooms. The Area Housing Authority, a residential account, has an MWAC x 34 full apartments.

Fiscal Impact:

Account	Classification	Current MWAC	Proposed MWAC
Artesian	Commercial	$36 x 64 = $2,304/mo	$36 x 4 = $144/mo
Glen Oak 1	Commercial	$36 x 1 = $36	No Change
Glen Oak 2	Commercial	$36 x 1 = $36	No Change
Area Housing Authority	Residential	$36 x 34 = $1,224	No Change

Recommended Action:
Approve the modification of the Artesian MWAC from 64 to 4 dwelling units.

Will-Serve/Proof of Service/Meter Request Form

A "Will-Serve" letter may be issued upon the District's completion of an analysis determining that all conditions of approval are met.

Required Attachments:

2. Tax Assessors parcel map that includes the subject property.
3. Subdivision map covering the location of the project.*
4. Documentation of existing permitted dwellings on the property.

   * Clearly indicate all APNs and legal lots involved in the project. Ensure any markups to county documents do not obscure the underlying information.

Review of Application for Will Serve Letter

Conversion of a 458 sf workshop into an ADU with existing plumbing for toilet, sink and washer, only adding 3x3 shower for Property with Existing Meter at 166 N Encinal.

Proposal

The proposed project consists of converting a 458-sf workshop with existing toilet, sink and washer to an ADU, adding a 3x3 shower. Property was issued a Will-Serve letter in 2017.

Applicant provided a detailed site plan, showing the location of the proposed structure.

Screening Step 1: Is the proposed building site on a legal lot? YES

Applicant provided a copy of a tax assessor parcel map and a subdivision map that indicate a single 0.17-acre parcel. APN: 017-0-144-09

Screening Step 2. Will the current allocation support an ADU? YES

Allocation Details:

- Allocation Case Identifier: AA-0386
- Allocation Category: 5/8" RES meter, 1 Parcel
- Parcel Size: 0.17 acre
- Current Base Fixed Allocation: 120 HCF/yr
- Current Base Variable Allocation: 133 HCF/yr
- Fixed Base Allocation Needed to Support "Tiny Home" ADU: 60 HCF/yr
- Deduction from Variable Allocation needed to Support "Tiny Home" ADU through drought stages: 70 HCF/yr

If the ADU are provided the customary fixed dwelling allocations, the new allocation for this property would be as follows:

- New Base Fixed Allocation: **180 HCF/yr**
- New Base Variable Allocation: **63 HCF/yr**

Recommendation

If a will serve letter is to be supplied, but must clearly state:

- Letter applies only to the proposed "Tiny Home" ADU as described in the applicant-provided preliminary site plan with the file date 2-14-2023.
- There will be no increase in the total (fixed plus variable) water allocation assigned to the meter Will Serve Letter will expire after 1 year.

I am requesting a "Will Serve" letter from MOWD. Ventura County is requiring this letter before they grant final approval for my newly constructed (90% completed), previously permitted (March 2023) 458 sq. ft Workshop.

In order to have a separate electrical meter service to this building, VC B/S will only approve this if the Workshop is converted to an ADU. The VC Planning Department approved this ADU conversion on Jan 5, 2023. However, the ADU conversion requires the addition of a 3'x3' shower. The Workshop is already plumbed for a toilet, washroom sink, washer, and utility sink.

To do this conversion, VC B/S is requiring a completely new building permit. I need to submit a new complete set of plans showing this shower addition. As part of this new permit process, they require a "Will Serve" letter from MOWD.

The currently permitted Workshop is connected to our water meter/ line. We are not applying for a new water meter, increased water allocation, or increasing the size of our current water meter.

Review of Application for Will Serve Letter

Conversion of a 384-sf permitted workshop into a “Tiny Home” ADU for Property with Existing Meter at 260 N. Alvarado.

Proposal

The proposed project consists of converting a 384-sf permitted workshop to a "Tiny Home" ADU.

Applicant provided a detailed site plan, showing the location of the proposed structure.

Screening Step 1: Is the proposed building site on a legal lot? YES

Applicant provided a copy of a tax assessor parcel map and a subdivision map that indicate a single 0.21-acre parcel. APN: 017-0-071-40

Screening Step 2. Will the current allocation support an ADU? YES

Allocation Details:

- Allocation Case Identifier: AA-0323
- Allocation Category: 5/8" RES meter, 1 Parcel
- Parcel Size: 0.21 acre
- Current Base Fixed Allocation: 120 HCF/yr
- Current Base Variable Allocation: 106 HCF/yr
- Fixed Base Allocation Needed to Support "Tiny Home" ADU: 60 HCF/yr
- Deduction from Variable Allocation needed to Support "Tiny Home" ADU through drought stages: 70 HCF/yr

If the ADU are provided the customary fixed dwelling allocations, the new allocation for this property would be as follows:

- New Base Fixed Allocation: **180 HCF/yr**
- New Base Variable Allocation: **36 HCF/yr**

Recommendation

If a will serve letter is to be supplied, but must clearly state:

- Letter applies only to the proposed "Tiny Home" ADU as described in the applicant-provided preliminary site plan with the file date 2-17-2023.
- There will be no increase in the total (fixed plus variable) water allocation assigned to the meter Will Serve Letter will expire after 1 year.

Proposal

The proposed project consists of tenant improvement to a permitted 439-sf garage with bathroom, adding 240-sf to an ADU with kitchen.

Applicant provided a detailed site plan, showing the location of the proposed structure.

Screening Step 1: Is the proposed building site on a legal lot? YES

Applicant provided a copy of a tax assessor parcel map and a subdivision map that indicate a single 0.95-acre parcel. APN: 081-0-101-115

Screening Step 2. Will the current allocation support an ADU? YES

Allocation Details:

- Allocation Case Identifier: AA-1052
- Allocation Category: 5/8" RES meter, 1 Parcel
- Parcel Size: 0.95 acre
- Current Base Fixed Allocation: 120 HCF/yr
- Current Base Variable Allocation: 324 HCF/yr
- Fixed Base Allocation Needed to Support ADU: 84 HCF/yr
- Deduction from Variable Allocation needed to Support ADU through drought stages: 100 HCF/yr

If the ADU are provided the customary fixed dwelling allocations, the new allocation for this property would be as follows:

- New Base Fixed Allocation: **180 HCF/yr**
- New Base Variable Allocation: **224 HCF/yr**

Recommendation
